

Project summary

To develop a dual-interface platform with distinct functionalities for customers and admins. The platform will allow customers to view detailed information about companies they have invested in, including data and the number of investments. On the admin side, administrators can manage platform members, create company profiles, and track investments made by each member

Project requirements

Develop slides 14-33 first. Slides 1-14 will be developed after.

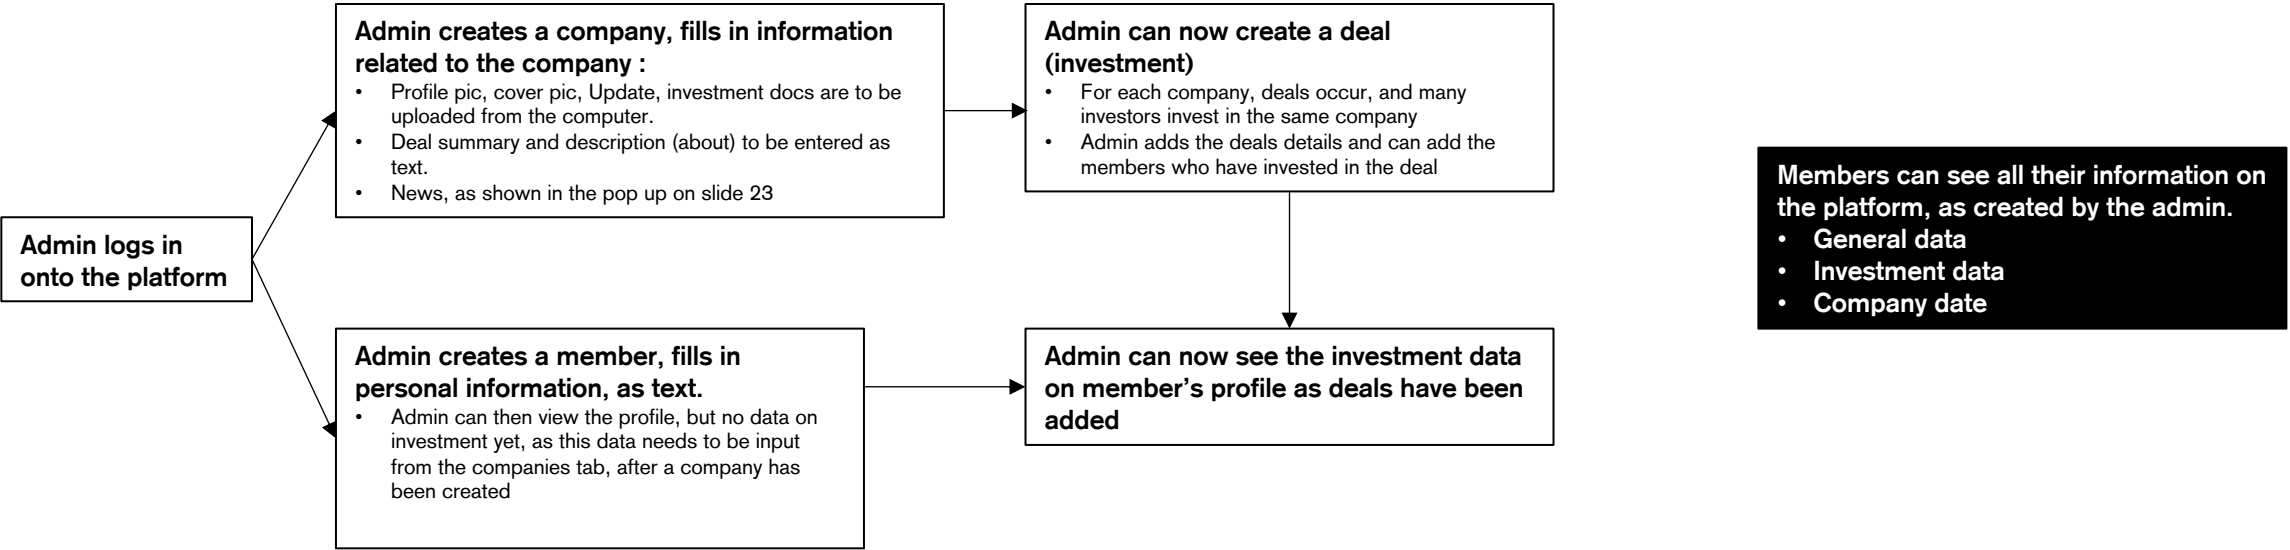

Develop the project under 5 working days. It's fast but the platform is not complex.

Disregard the numbers data except the ones admin will have to input. We will do the calculation together once platform is developed

Log in screens are not designed yet, but you can develop them directly using same style.. As it's a basic.

Project flow

The platform flow below shows how the flow works between screens, which actions come first. It is also shown as a logical order from slides 14-33.

NEW COMPANY

ABOUT SPACEX

SpaceX is a private aerospace manufacturer and space transportation company founded by Elon Musk in 2002. Known for its reusable rockets like the Falcon 9 and Falcon Heavy, SpaceX aims to reduce the cost of space access. It develops spacecraft such as Dragon and Crew Dragon for missions to the International Space Station. SpaceX is also working on the Starship spacecraft for missions to Mars and deploying the Starlink satellite constellation to provide global internet coverage. Ultimately, SpaceX's goal is to enable human colonization of Mars.
